

Solutions for a Compliance-driven Organization

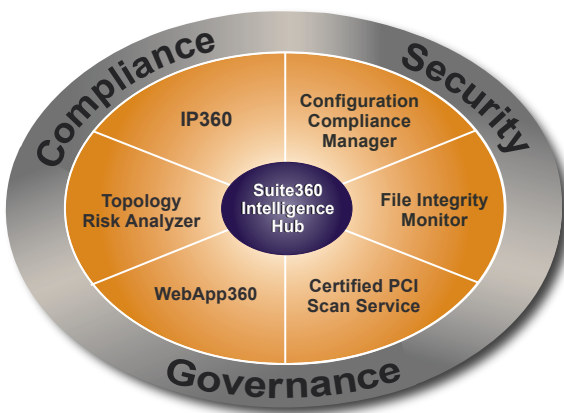

nCircle is the leading provider of security risk and compliance auditing solutions for physical and virtual IT environments. nCircle Suite360™ sets the industry standard for comprehensive asset discovery, accuracy, depth of coverage and analytics. Suite360's integrated architecture delivers cost savings through agentless design and time savings through unified risk and compliance reporting.

More than 4,500 enterprises, government agencies and service providers around the world rely on nCircle's proactive solutions to manage and reduce security risk and achieve compliance on their networks. nCircle has delivered proven solutions that answer the most important questions in today's compliance-driven enterprise:

- How secure and compliant is our network?
- Which top issues must we address today to improve security and achieve compliance?
- Who is accountable and how are they doing?

nCircle Suite360

nCircle Suite360 uniquely delivers the answers. nCircle Suite360 is a fully integrated best-in-class agentless product line for auditing the entire information technology stack across a global network. nCircle's enterprise class solutions employ patented discovery technology to ensure every asset on a network is proactively assessed for security risk and compliance. nCircle eliminates the cost and complexity of assembling and operating products from multiple vendors by delivering Suite360, an integrated solution with centralized management, objective measurement, consistent scoring and fast, agentless deployment.

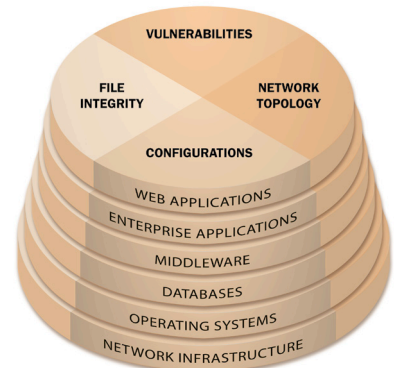

- IT GRC Analytics and Reporting
- Vulnerability Management
- Configuration Auditing
- Web Application Scanning
- Line of Sight Risk Analysis
- File Integrity Monitoring
- PCI Scan Service
- HITRUST Audit Service

nCircle Suite360 delivers:

- **Unified view of security and compliance** in a fully integrated product line
- **Analytics for streamlined IT decision-making** with objective measurement and unified scoring
- **Automated, continuous auditing** delivering cost-effective, sustainable compliance
- **Fast deployment, instant results and low cost management** using agentless technology
- **Flexible pricing and deployment** with a modular suite and subscription or perpetual licensing
- **Comprehensive auditing of the entire IT stack** throughout both physical and virtual environments

Staying Ahead of Changing Threats

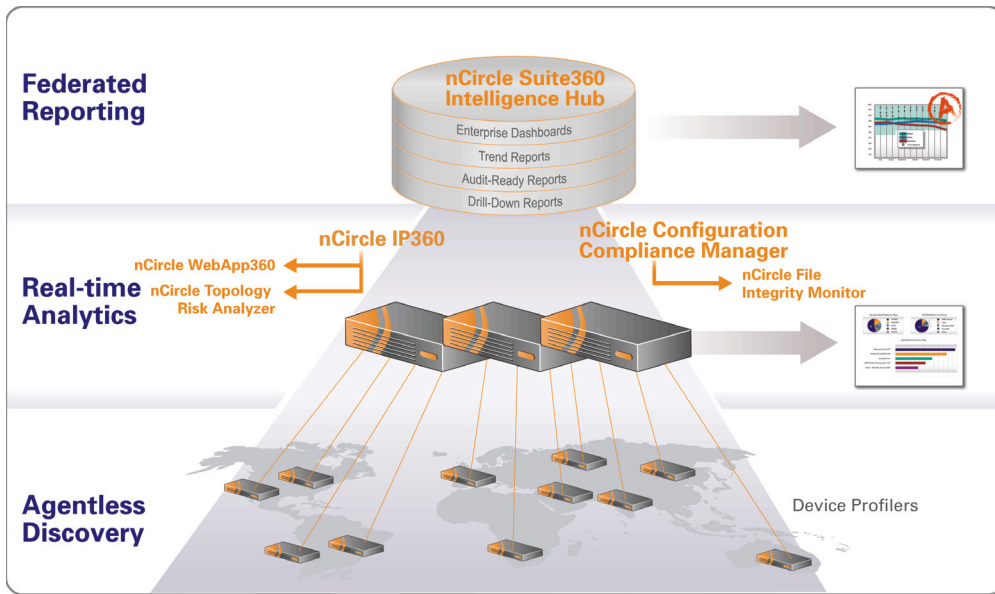

A critical component of security and compliance auditing solutions is comprehensive coverage of the operating systems, applications, vulnerabilities and configurations found in enterprise networks. nCircle's industry leading VERT team is focused on developing accurate, non-intrusive discovery signatures that are both current and relevant to large enterprises. New signatures are added regularly and automatically updated on nCircle appliances.

nCircle Suite360 audits the entire IT technology stack for security and compliance.

“nCircle – The company's mixture of vulnerability scanning, Web application scanning, file-integrity monitoring and configuration management put it at the forefront of those trying to deliver risk-based security.”
